

MR. DAVITT FOR UNION.

He Addresses the Nationalists at Castle Wellan.

Making a Vigorous Plea for United Action by Orangemen and Catholics.

England Acts with the Other Powers Against Turkey.

LONDON, September 22.—The National League meeting at Castle-Wellan, county Down, yesterday, was quiet and orderly, a circumstance which is amply explained by the fact that the road was lined for a mile with the red coats and bright bayoneted British regular troops. The speakers were William O'Brien, M. P., and Michael Davitt. The latter treated his auditors to a genuine surprise. He declared that he was second in command of a political army which was invading the province of Ulster with a fixed purpose and with a confident expectation of victory. The nationalists had now one great and absorbing desire as far as the North of Ireland was concerned. That was for political unity between the Orangemen and Catholics. Mr. Davitt begged the audience to forget their religious differences of opinion for the sake of the patriotic duty which is incumbent on Orangemen and Catholics alike. "Let religion give way for once to patriotism," he said, "and then, and then only, shall we get home rule for Ireland." The audience, which was composed almost wholly of Catholics, was taken entirely by surprise at these outspoken advances toward the friendship of the Orangemen. A few men in the crowd raised a cheer for Davitt and union, but most of them in mute astonishment, as though discrediting the evidence of their senses. Two inferences are drawn in London from the episode at Castle Wellan. The first is that Davitt is a man of great courage and determination. The second conclusion is that the Fenianists have determined upon a new line of tactics in carrying the present agitation in the North of Ireland. It is not believed that the Orangemen will be so easily intimidated, although it must be admitted that they have been exceedingly restless under the influence of the Fenianists. It is feared that they will permit themselves of the nationalists.

UNITED AGAINST TURKEY.

The British Government Joins with the Other Powers in Their Action.

VIENNA, September 22.—The great powers are now all united again in a policy of resisting Turkey's efforts to emancipate herself from international control. The British government, which has hitherto been holding aloof from the quarantine dispute, played at the attitude of the powers at the recent conference, has just instructed its charge d'affaires to follow the same line of policy as the other powers in regard to that matter. The Porte, which desires to conceal its apprehension with respect to the disturbances in Albania, is taking advantage of the pressure of the great powers to establish strong positions along the frontier, ostensibly to control the communications, and in reality to establish a strong position in the Balkans. The British government, which has hitherto been holding aloof from the quarantine dispute, played at the attitude of the powers at the recent conference, has just instructed its charge d'affaires to follow the same line of policy as the other powers in regard to that matter. The Porte, which desires to conceal its apprehension with respect to the disturbances in Albania, is taking advantage of the pressure of the great powers to establish strong positions along the frontier, ostensibly to control the communications, and in reality to establish a strong position in the Balkans.

OBSTRUCTING THE WOO LUNG.

Chinese Authorities Persist in Closing the River Against the French.

LONDON, September 22.—A despatch from Shanghai, received this afternoon, states that notwithstanding the protests of the various consuls and the Shanghai Chamber of Commerce, the Chinese authorities have commenced blocking the entrance to the Woonung river at the outer bar, but have promised to leave the passage-way open for the French gunboats. The Chinese authorities have commenced blocking the entrance to the Woonung river at the outer bar, but have promised to leave the passage-way open for the French gunboats. The Chinese authorities have commenced blocking the entrance to the Woonung river at the outer bar, but have promised to leave the passage-way open for the French gunboats.

Fighting About Khartoum.

CAIRO, September 20.—A messenger from General Gordon has arrived at Dongola with the information that General Gordon has had two serious battles with the rebels who were settling Khartoum in the last few days.

General Gordon's delay in proceeding to the front is now learned to be due to the fact that the supplies intended for the army of occupation have already been exhausted. The governor-general has been ordered to supply the deficiency. The report of Gordon's victories confirmed. LONDON, September 20.—Sir Evelyn Baring has telegraphed to the secretary of the reports of General Gordon's recent victories in the Sudan, whereby the rebels were compelled to raise the siege of Khartoum.

Disturbance at Newry.

NEWRY, September 22.—Great excitement prevailed here last evening upon the return of a Nationalist procession from Castle Wellan, during the disturbances at Newry. The procession was crowded, and much cheering and hooting was heard. In. Stones were thrown and windows smashed. The police at Castle Wellan charged on the mob and made several arrests. The mob threatened to attack the police, but were dispersed.

Remarkable Exemption from Cholera.

PARIS, September 20.—At a meeting of the French Congress at Blois yesterday, the chief engineer of Marseilles revealed the fact that a case of cholera occurred in Marseilles as early as June 10. The chief engineer of Toulon stated that the disease had been introduced by a vessel from among butchers and bakers. In no instance had street scavengers been stricken with the malady.

Spread of the Plague.

NAPLES, September 19.—The epidemic is spreading to the west of the city. The director of the Incurable hospital is dead. The workmen of Spezia are now allowed to leave the city to work.

Father Council Recants.

ROME, September 20.—Father Council has written a letter to the Vatican, expressing his submission to the Vatican, and condemning all passages in his three latest works which can be construed as impeaching against the faith, morals and the Church. He further expresses the hope that he may be restored to the Pope's favor.

Profets of Continued Peace in Europe.

LONDON, September 19.—The whole German and Russian press consider the recent meeting of the emperors as one that will result in the security of peace to Europe. The Standard's Vienna despatch says: Count Kalnoky, in describing the royal visit to Bratislava to a friend, dwelt upon the

contrast between the number of police and soldiers everywhere until they arrived at Skienens, where there was no more than a few men for the safety of the royalties during the whole time the three emperors were there. He attributed this to the love of the people for the czar, and to the czar's winning manner. He said Prince Bismarck especially was good-humored. Everybody left Poland with excellent impressions.

A Parade Forbidden at Newry.

DUNELM, September 20.—The people of Newry are greatly excited. William O'Brien and Michael Davitt halted at that place this afternoon on their way to Castle Wellan, where they are to speak at the National League meeting tomorrow. It was proposed to give them a grand reception, and a procession to start them through the town was to be one of the chief features. At the last moment the authorities, fearing trouble, issued orders prohibiting the procession. The order caused general indignation, but no attempt was made to violate it. Trouble is expected at Castle Wellan tomorrow, and large numbers of extra police have been sent there tonight.

German Corvettes.

BRISLIN, September 20.—Two corvettes will leave early in October to protect the German colonies on the west coast of Africa. It is stated that these corvettes are being fitted out at the request of Dr. Nachtigal, the German consul-general in West Africa, for service in the vicinity of the Cape of Good Hope. The corvettes are feared by the inhabitants of the country bordering on the Cameroon's river, and are also the English traders, who contend that the corvettes are being fitted out to protect the river of the British government. The corvettes are also the English traders, who contend that the corvettes are being fitted out to protect the river of the British government.

Le Paris Denounces England's Egyptian Policy.

PARIS, September 20.—Le Paris declares that it is at a loss for words to fully describe the heinousness of the Egyptian policy of England. It is a loss for words to fully describe the heinousness of the Egyptian policy of England. It is a loss for words to fully describe the heinousness of the Egyptian policy of England.

Sexton Seeks a New Constitution.

BALTIMORE, September 20.—Thomas Sexton announced yesterday that he had received from the representative from Sligo, and will enter the contest for another seat.

Royalist Activity in France.

PARIS, September 20.—The prefects of fifteen different departments have formally notified M. Waldeck Rousseau, the minister of the interior, of the formation of royalist committees.

National Meeting Proclaimed.

DUBLIN, September 20.—Earl Spencer, lord-lieutenant of Ireland, has proclaimed the Nationalist demonstration announced to be held at Bauldow, County Kerry.

France's Demand of the Khedive.

PARIS, September 21.—France has demanded of the Khedive that the decree diverting revenues from the payment of the Caisse debt be withdrawn and the financial status quo be resumed.

SIX BODIES IN THE CELLAR.

Victims of a Prussian Hotel Keeper Supposed to Have Fled to America.

LONDON, September 19.—The Prussian police believe that America is harboring at this moment a wholesale murderer, whose many crimes have just been brought to light. His name is Sievert, and he was until recently the proprietor of a hotel in the city of Berlin. He was a man of large stature, with a broad forehead, and a thick, muscular man, with florid complexion and yellow hair. A few weeks ago Sievert sold out his hotel and left Pomerania, and he was last seen in the city of Berlin. He was a man of large stature, with a broad forehead, and a thick, muscular man, with florid complexion and yellow hair. A few weeks ago Sievert sold out his hotel and left Pomerania, and he was last seen in the city of Berlin.

SIX ORPHAN BOHEMIANS.

Their Insane Mother Jumps from a Ham-burg Steamer and is Drowned.

NEW YORK, September 22.—When the Hamburg steamer "Himmler" left New York yesterday, it carried six orphan Bohemians, who were the children of a woman who had jumped from the ship. The children were found by the crew of the ship, and were taken to New York. The children were found by the crew of the ship, and were taken to New York. The children were found by the crew of the ship, and were taken to New York.

THEY CLUNG TO THE WRECK.

Sufferings and Rescue of the Schooner John J. Taylor's Crew.

NEW YORK, September 22.—The steamer Clen-fuegos, from Nassau, arrived yesterday, bringing Thomas Mumford, master, and the first mate and three of the crew of the schooner John J. Taylor, which was wrecked off the coast of Florida on September 11, and which drifted for several days before being rescued. The schooner was wrecked off the coast of Florida on September 11, and which drifted for several days before being rescued. The schooner was wrecked off the coast of Florida on September 11, and which drifted for several days before being rescued.

A German Astronomer Finds a Comet in Pegasus.

STUTTGART, N. Y., September 21.—Dr. Lewis Swift, of the Lick Observatory, yesterday received a telegram from Wolf, a German astronomer, announcing the discovery of another comet verified last night at Strasburg. Its position was 24 degrees, 21 hours 15 minutes 22 seconds, and it was moving toward the northeast at 54 seconds, moving slowly northeast. It is reported as being bright, and is in the constellation of Pegasus. The comet was discovered by Dr. Swift on the 19th of September, and it was named after him.

A Pair of Antediluvian Infants.

NEW YORK, September 20.—Two rare animals, claimed to be of antediluvian origin, were landed at Hokeny yesterday by the steamer "Werra," and are expected to develop into mammoths, if they ever attain the size of their ancestors. The larger one is about four feet in height and both are covered with black and ash-colored bristles. They were taken to the city of New York, and are expected to develop into mammoths, if they ever attain the size of their ancestors.

No Attempt to Bulldoze Beecher.

NEW YORK, September 19.—The statement that a conference of leading Plymouth Church members had been held, and that Mr. Beecher had been re-nominated with for his course in politics, has been shown to be untrue. A majority of the members, as is well-known, are Republicans, and would naturally reject Mr. Beecher's choice, but Assistant Pastor Halliday said to-day: "There is no trouble in the church, and is not likely to be. Each member, from Mr. Beecher down, is independent and can work and vote as he chooses, without being called to account by any other member."

HAS SHE A LOVER?

Sadie Robinson's Strange Robbery of Her Parents.

Stealing a Bag Containing \$60,000 Worth of Railroad Bonds and Diamonds.

The Bag Left With a Drug Clerk on Church Street.

FRAMINGHAM, September 22.—This town is the scene of one of the most remarkable and inexplicable robberies in record. The robbery is of \$60,000 in bank bills, negotiable bonds and diamonds by a school girl between fifteen and twenty years of age. She is the daughter of Charles E. Robinson, who resides on Irving street, and is called by her friends "Sadie." But little is known of the family, as they recently moved into town. It is alleged that at about 5 o'clock Monday morning Miss Sadie arose and obtained possession of a small leather bag in which the valuables were kept, taking it with her when she went to Boston to school on the 8 o'clock train. Mrs. Robinson was negotiating the purchase of a new dress at the time, and an insurance agent named Giles, and missing the bag that afternoon informed Mr. Robinson of her loss. Mr. Giles went to Boston on the 2 o'clock train, and informed the police of the loss. The police searched the city, but found nothing. The police searched the city, but found nothing.

A Methodist Conference Suddenly Adjourns.

CHICAGO, September 19.—Despatches received here late this afternoon indicate that the anti-queer shock was very generally felt throughout Ohio, Indiana and Michigan. At Cecil, O., the Methodist Episcopal Central Conference was in session, and was suddenly adjourned on the 19th.

Brick Blocks Rocked at Auburn.

A heavy shock of earthquake felt here at 2:15 p. m. today, lasting about ten seconds. Brick blocks were rocked from east to west and much excitement prevailed. No damage was sustained. The shock was felt along the line of the Postal telegraph from Legonia to Wellington, Ohio.

Effects Elsewhere.

YRELAND, Mich., September 19.—A severe shock of earthquake felt here this evening.

PORT HURON, Mich., September 19.—At 2:49 p. m. a slight shock of earthquake was felt here.

DETROIT, September 19.—A horizontal motion was felt here this evening, lasting about one minute.

THE WILD WEST UNDULATES.

An Earthquake Felt in Half a Dozen States.

The Shock Lasted Ten Seconds, and All the Usual Accompaniments.

CINCINNATI, September 19.—The shock of an earthquake was felt in this city and Covington this afternoon. A rocking motion was felt from north to south. It was a gentle undulation, without any tremor or upheaval. The shock was about as follows: The entire building was writing at his home on Cutter street, said he felt his table vibrate. It stopped, and then moved again, but violently than before. In Covington a little daughter of Mr. Worthington who was sick in bed was frightened to feel her bed move, and screamed in terror that some one was moving the bed. Reports from Mr. Vernon and Delaware, Ohio, say the shock was felt at those places.

Students and Workmen Badly Scared at Columbus.

COLUMBUS, September 19.—At 2:40 this afternoon a shock of earthquake was felt in different parts of this city, the vibrations lasting thirty seconds. At the Capitol University the chandeliers swayed to and fro, and students left their rooms in great haste. The entire building was writing at his home on Cutter street, said he felt his table vibrate. It stopped, and then moved again, but violently than before. In Covington a little daughter of Mr. Worthington who was sick in bed was frightened to feel her bed move, and screamed in terror that some one was moving the bed. Reports from Mr. Vernon and Delaware, Ohio, say the shock was felt at those places.

A Remarkable Story of Infatuation and Intrigue.

The case of Orrin S. Knapp, special administrator of the estate of Thatchar Magoon and Thatchar Magoon, Jr., both of Medford, and others, against Margaret Magoon, was continued today before Judge Dyer in the equity session of the Supreme Court. The case involves extensive transfers of property made by the late Thatchar Magoon, who died May 27, 1883, to his former servant, who was afterwards adopted by him, and who received a large share of the property from the estate of Thatchar Magoon.

He Gives Her the Clothing and Jewels of His Insane Wife.

Hon. E. R. Hoar, who appeared for the plaintiff, told the following interesting story: Margaret O'Hare, the defendant, known now as Margaret Magoon, was born in Ireland in 1824, but early in her life came to America, and was adopted by the Supreme Court. The case involves extensive transfers of property made by the late Thatchar Magoon, who died May 27, 1883, to his former servant, who was afterwards adopted by him, and who received a large share of the property from the estate of Thatchar Magoon.

AROUND THE FARM.

Edited by ANDREW H. WARD.

FERTILIZER FRAUDS.

The following inquiry was made of the New England Homestead, and their reply follows: "About what weight of pure ground bone would be equivalent to a cord of good straw manure, feeding down for grass (Harold, Toland county, Conn.)

A difficult question to answer. Farmyard manure as food for plants, is a very uncertain substance, because of its varying content of water, and of the quality of the food from which it is produced. Recent analysis of what is called 'average manure,' and of bone meal, furnish a basis of comparison. A thousand pounds of manure contains five pounds of nitrogen, six pounds of potash and three pounds of phosphate. An equal weight of bone meal contains four pounds of nitrogen, two-tenths of a pound of potash, and twenty-three pounds of phosphate. The elements in manure are, therefore, readily available than in the raw bone.

In the Massachusetts Agricultural report for 1883 there is the analysis of six different lots of ground bones, obtained from different sources; the average analysis of them is nitrogen 3.55 per cent, and phosphoric acid 23.28 per cent; or in 1000 pounds ground bones, 35.5 pounds nitrogen, and 232.8 pounds phosphoric acid. There is a discrepancy between the two authorities, but that in the agricultural report is correct. In the same paper is a notice from which we quote the following:

"Professor H. M. Pollard is an 'agricultural chemist' who has an office with the Perry oil company at Pawtucket, R. I. There he keeps on hand and for sale special fertilizers. He sells them at the lowest price of \$50 per ton. A representative of The Homestead recently called on him, and he showed him some of the suspected seven samples of his alleged fertilizers. These samples were numbered; the first three were sent for analysis to the Connecticut experiment station; the last three to the Massachusetts experiment station, with the following results:

1. For top-dressing. Guaranteed analysis: Ammonia, 2 1/2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent. Actual analysis: Ammonia, 1 1/2 per cent; phosphoric acid, 3 1/2 per cent; potash, 8 per cent.

2. For cabbage. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

3. For potatoes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 7 1/2 per cent; potash, 8 per cent.

4. For corn. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 7 1/2 per cent; potash, 8 per cent.

5. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

6. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

7. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

8. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

9. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

10. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

11. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

12. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

13. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

14. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

15. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

16. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

17. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

18. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

19. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

20. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

21. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

22. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

23. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

24. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

25. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

26. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

27. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

28. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

29. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

30. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

31. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

32. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

33. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

34. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

35. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

36. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

37. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

38. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

39. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

40. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

41. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

42. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

43. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

44. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

45. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

46. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

47. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

48. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

49. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

50. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

51. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

52. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

53. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

54. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

55. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

56. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

57. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

58. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

59. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

60. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

61. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

62. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

63. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

64. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

65. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

66. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

67. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

68. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

69. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

70. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

71. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

72. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

73. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

74. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

75. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

76. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

77. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

78. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

79. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

80. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

81. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

82. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

83. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

84. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

85. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

86. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

87. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

88. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

89. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

90. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

91. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

92. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

93. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

94. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

95. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

96. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

97. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

98. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

99. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

100. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

101. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

102. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

103. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

104. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

105. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

106. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

107. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

108. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

109. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

110. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

111. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

112. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

113. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

114. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

115. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

116. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

117. For French turnips. Guaranteed: Ammonia, 2 per cent; phosphoric acid, 5 per cent; potash, 10 per cent.

118. For round turnips. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

119. For radishes. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

120. For cabbages. Guaranteed: Ammonia, 4 per cent; phosphoric acid, 8 1/2 per cent; potash, 8 per cent.

BREEDERS' TABLE-SEPTEMBER.

Date on which an animal served is due to give birth:

	Mare,	Cow,	Ewe,	Sow
Birth:	Served.	4th	21st	16th
